LILIAN C.O

FRONTEND DEVELOPER & PRODUCT MANAGER

WORK HISTORY

Frontend Developer - Full-time

Supreme Marketing Limited | March 2023 to Present

- Designing, developing, and testing user interfaces for websites and web applications.
- Collaborating with cross-functional teams to define, design, and ship new features.
- Creating and implementing web design standards and best practices.
- Ensuring the technical feasibility of UI/UX designs.
- Optimizing website and web application performance.
- Staying up-to-date with emerging trends and technologies in web development.

Software Engineer - Intern

Alt School Africa| March 2022 to March 2023

- Spent one year as an intern and frontend development student learning the basics and standards for web development, algorithms and technical do's.
- Brushed up on my skills with React.js and learnt Vue.js.
- Worked collaboratively with other members of my group and circle to build different web solutions while applying the needed standards.

Product Manager and Frontend Developer - Contract

BuildingBloques | March to November 2022

- Secured and closed an international contract for BuildingBloques to develop a mobile and web application for one of their clients in the US.
- Assumed the role of a Product Manager who is overseeing the design of the Mobile and Web Application.
- Conducted interviews to get the best talents within the specifications and budget of the client.
- Currently overseeing a team of Mobile, Web and Backend developers who are building the mobile and web application of the company.

Frontend Developer - Intern

I4G x Zuri x HNG Internship | March to October 2021

- Collaborated with UI/UX designers, Frontend Developers and other members of the project team to develop the site concept interface design and architecture of the website.
- Designed and developed a web application that provides school information for students in Nigeria.
- Web Application building in coordination with the engineering team to deliver a quality product for Zuri.chat.
- Planned and created features for the youtube music and video plugin, and workspace admin settings that are currently in use on the web app.

PROFILE SUMMARY

I am a front-end web developer with robust problem-solving skills and proven experience in creating and designing web applications.
I am mostly interested in bridging the gap between organizations, businesses and their users by creating user friendly components and bringing products to life.

- Product Manager at BuildingBloques

I am a front-end web developer with robust problem-solving skills. I am excited to apply for your Front-End Web Development position. I'm passionate about carrying out an outstanding job and have received multiple compliments from my past managers and colleagues for collaborative, quick critical thinking, and logical technical skills to improve work efficiency.

With the skills I have acquired over the years in my previous roles, I am able to translate design wireframes from Figma or Adobe XD into responsive HTML, CSS while also using JavaScript and React for my dynamic and reusable components and adhering to best practices for performance, UX, SEO, and accessibility. I am skilled at writing well-designed, testable, and efficient code using current best practices in Web Development.

I have 2 years of experience with HTML, CSS, JavaScript, and React, and 5 years of experience with WordPress, Wix and Squarespace. My keen attention to detail and dedication to solving any problem at hand is what separates me from other candidates with similar qualifications.

For a greater presentation of my background and qualifications, please review my attached resume. I am eager to learn and will greatly appreciate your consideration.

Best Regards,

Lilian Okeke.
